

BELTS, HOSES, THERMOSTAT, & COOLANT REPLACEMENT

SERVICE INCLUDES

- Comprehensive inspection of the complete cooling system of the engine & alternator
- Replace the top & bottom radiator hoses
- Replace engine belts
- Replace thermostat
- Fill the engine radiator & reserve with KOHLER® Genuine Coolant with hybrid organic acid technology (HOAT)

Replace for ultimate reliability.

The average life expectancy of a unit's belts, hoses, thermostat, and coolant is three to four years based on runtime and unit condition. Fidelity Power Systems® suggests customers replace aging parts with new factory original equipment manufacturer (OEM) parts to prevent any kind of system failure and maintain the system's reliability.

Additionally, we offer a four-year extended life coolant, which reduces the overall cost of coolant replacement, including labor costs. KOHLER® Genuine Coolant, with hybrid organic acid technology (HOAT), includes additives designed to extend the life of the unit components and improve overall operational efficiency.

FIDELITY POWER SYSTEMS

One of the nation's largest distributors and service providers of KOHLER® generators.

Over the past 40 years, Fidelity Power Systems® has become one of the nation's largest distributors of KOHLER® Generators and Power Systems in the mid-Atlantic region. We offer a full line of commercial, industrial and residential emergency power systems including stand-by generators, automatic transfer switches, paralleling switchgear and replacement parts.

Fidelity Power Systems award-winning service teams include factory-trained and authorized service technicians who specialize in emergency power systems, supporting commercial, industrial, health care, critical facilities, and more.
